As a follow up to my conversation this afternoon with Cindy C. I talked to Dennis Carney. Here's what I learned.

Sampling will continue next week, Feb 6 to 10 and Feb 13, at the rate of 4 homes a day. There could be from 0 to 4 homes sampled on February 14 depending on what happens the prior week. At that point, it's expected that the sampling contractors will demob from the area and emphasis by EPA will be on reviewing data received from laboratory analysis.

There are a few home owners that are currently out of the area that EPA has not been able to speak with. It's possible that these home owners may agree to sampling which would happen in the beginning of March.

A second round of sampling is anticipated sometime in March at the homes where EPA has provided water and at any home from the first round that had elevated results. Dennis emphasized that the second round will be for fewer parameters and regular turn around times for preliminary results.

We'll discuss further at Monday's coordination meeting. Let me know if you have any questions or concerns that you feel should be brought up at the meeting.

Thanks for all you and your staffs are doing. Randy and I are looking forward to coming down on Tuesday.

Regards, John
